In terms of question 52 additional sites should be allocated to facilitate the sustainable growth of existing employment areas.

This supports the established commitment of the employment market (industrial / commercial sites) and supports phased growth of these hubs of employment land.

The employment land portfolio needs to reflect the specific employment land requirements of villages, town centres, industrial estates and strategic employment land sites.

The end use, through appropriate restoration, of minerals sites offers key opportunities in terms of sites established with access to the strategic road network, brownfield status and their proximity to existing employment hubs.
