

## SOUTH STAFFORDSHIRE LOCAL PLAN REVIEW PREFERRED OPTIONS – SEPTEMBER 2021

### Specific response to questions covered in letter dated 9 December 2021

Q3a – general agreement that strategy is correct but important to emphasise the need to deliver strategic objective 6 through facilitating development on long established employment allocations such as ROF site.

Q5 – general support for spatial development strategy with particular emphasis on the continued allocation of strategic sites for employment along the M54 corridor. With particular regard to the proposed allocation of the WMI site (see below) there is a continued need for a range and choice of good quality employment land which the delivery of the longstanding strategic employment allocations would provide.

Q10 – general support for the principle of allocation of the WMI site but this should take place alongside delivery of other good quality employment land so that there is not an over-reliance on the WMI site coming forward that could result in difficulties if delivery of that site is delayed.
